Dear Jim

INVERBOYNDIE AND KIRKHILL WASTE TREATMENT PLANTS

Now that both plants have completed their commissioning trials, I thought that it would be appropriate to acknowledge the way in which your company have fulfilled a very demanding contract specification.

In each location the plant had to be accommodated within very tight site constraints which placed a significant added challenge to the contract. The outcome has produced two very compact and effective arrangements.

In recognition of this, we have created the enclosed Golden Shoehorn Award by way of acknowledgement and congratulation of your successful output.

On behalf of Aberdeenshire Council, I thank you for the endeavours and personal commitment of you and your staff in achieving the success of the plants and trust that you will accept this fun award in the spirit of appreciation and friendship that it was created.

I wish you and your company every success and look forward to the potential of working together on new projects in the future.

With kind regards.

Head of Waste Management

Eric Melrose Director of Planning and Environmental Services
