Richmond Hill
Ontario, Canada L4C 9S6

Dear Ed:

Capital Compost has been operating the two tunnel, in-vessel organic waste composting system, as provided by Wright Environmental since mid 1999. The operation to date has been largely successful with negligible side effects. We recycled 1600 tons of organic materials retrieved from the municipal solid wastestream as well as large quantities of yard and wood waste during 1999. The compost produced has been of consistently high quality and has been well received by the local landscaping community.

Sincerely,

Thomas E. Julien
General Manager
