Dear Sir/Madam

Lynnbottom Composting Facility

The Isle of Wight Council has had a Wright in-vessel composting system with three tunnels operating since early 1999. The system has produced compost of good quality and testing has revealed no sign of e-coli or toxycara. Monitoring for airborne pathogens has also revealed no problems.

The composter has significantly aided the Council's recycling/diversion from landfill initiatives and during the year of its operation, the diversion rate has risen from 33% to 41%.

The facility has been well received by members of the Council and all sections of the Island public.

Should you have any queries I would be happy to assist.

Yours faithfully

Operations Manager
